

PinovX - Order Request Form Developer Brief

Access Control

This form should only be visible to users who have completed KYC/KYB verification. Redirect unverified users to the KYC verification page.

Order Request Form Fields

- Full Name (auto-filled, read-only)
- Email (auto-filled, read-only)
- Currency to Send (Dropdown): CAD or AUD only
- Currency to Receive (Dynamic Dropdown based on sending currency)
- Amount to Send (Number input, required)
- Destination Country (Dropdown, optional but useful)
- Recipient Name (Text input, required)
- Recipient Account/Wallet (Text input, required)
- Transfer Method (Dropdown: Bank Transfer / Mobile Money / Crypto Wallet)
- Purpose of Transfer (Optional)
- Notes/Instructions (Optional)
- Upload Document (Optional: .pdf, .jpg, .png)

Currency Logic Rules

If "Currency to Send" = CAD, then show receiving currencies:

- INR, NGN, USD, GBP, AUD, GHC, USDT, BTC, ETH, BNB, USDC

If "Currency to Send" = AUD, then show only crypto:

- USDT, BTC, ETH, BNB, USDC

No fiat currencies should be available when sending AUD.

Backend Handling

PinovX - Order Request Form Developer Brief

- Store the form data in the backend database or admin panel.
- Optionally trigger an email to the admin.
- Optional: Queue request in dashboard for processing.
- Display user message: "Your order request has been received. Our team will contact you shortly."

Security

OTP verification is recommended on form submission. Each submission should be logged in user activity for auditing.
